

The Cost Effective Approach to Quality Filtration

FTC introduces its new MAX-OUT BASKET that converts standard bag housings into high efficiency cartridge housings.

The unique design of this non-perforated basket provides for o-ring positive seals between the basket and housing as well as the cartridge and basket. The MAX-OUT BASKET is designed to fit inside existing bag housings without modification. It is available in a variety of materials to meet industry standards and chemical compatibility.

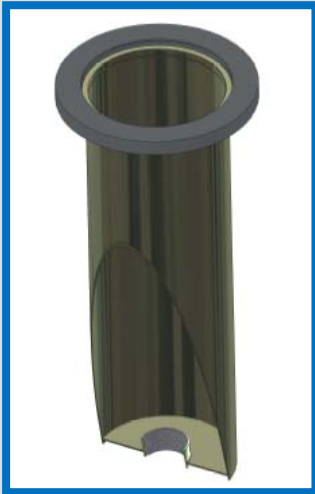

Since the MAX-OUT BASKET changes the fluid flow path through the filter element from inside-out to OUTside-in, the entire array of FTC cartridge media and construction materials are now available for “bag” applications. MAXimize your bag housing opportunities with this FTC solution that provides optimum performance while minimizing filtration costs.

SIMPLE INSTALLATION

Remove Existing Basket

Install MAX-OUT Basket

Install MAX-OUT Cartridge

MAX-OUT FILTER OPTIONS

CARTRIDGES AVAILABLE

MAX-OUT PLATINUM

- 99.98% Efficiency
- 56 Sq. Ft. Surface Area
- 10 # Dirt Holding Capacity

MAX-OUT DEEP PLEAT

- 99% Efficiency
- 35 Sq. Ft. Surface Area
- 6 # Dirt Holding Capacity

MAX-OUT GUZZLER

- Removes Oil From Water
- 5 PPM Oil Effluent
- 3.5 Liters Oil Per Cartridge

CONSTRUCTION MATERIALS

FILTER MEDIA

- Cellulose
- Glass
- Polyester
- Polypropylene

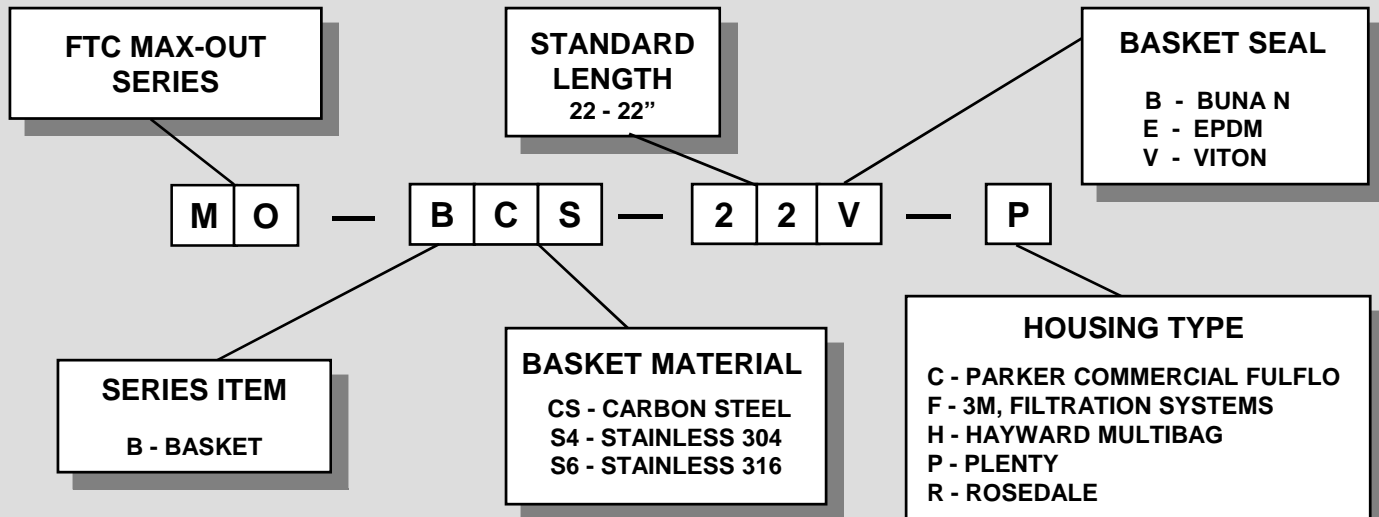

SUPPORT MATERIALS

- Polypropylene Caps & Cores
- Metal Caps & Cores
- Nylon, Polyester, Polypropylene

GUZZLER MATERIALS

- Proprietary Absorbent
- Activated Carbon
